

Leadership Worthington

DISCOVER YOUR POTENTIAL

Idea for Community Enrichment Projects

Participants in the Adult and High School Leadership Development programs are required to select one or more projects which will provide benefit to the Worthington community. The class members work in teams and the focus is on designing sustainable projects for the community, without creating a dependence on the group's continued service. Class members are educated throughout the year on using the latest leadership theories and research to create incredible processes that are sustainable and self-learning. Visit our Community Impact section to see some of these projects.

We invite members of the Worthington community to present a project idea to our class. We welcome any presentation on any issue. Please take some time to consider challenges you face with your organization or you see the community face. We intend to make a tremendous impact on our community, whether it's with business, non-profit, government or family.
